

Enabling Audio Recording Using Creative Webcam's Built-in Microphone

Keywords / Key Phrases: how to, audio recording, enable, microphone, built in, no audio, no sound, vf

Summary:

- ✓ No audio in my video recordings using Live! Cam Center and the webcam built-in Microphone.

To enable the audio recording from the built-in microphone ensure that **Built-in** is selected as the Audio source. Click on Audio Source in the bottom right corner of Live! Cam Center, and then select **Built-in**. Selecting **Off** will mute the built-in microphone.

Also, to enable audio recording from the built-in microphone ensure that the built-in microphone is selected:

Windows Vista:

1. Launch Live! Cam Center
2. Click on **Tools**
3. Go to **Audio Source Control**
4. Select Digital Audio Interface under Audio Source
5. Click **OK**

Windows XP:

1. Open Live! Cam Center.
2. Click on **Tools**.
3. Go to **Audio Source Control**.
4. Select USB Audio Device under Audio Source.
5. Click **OK**.

If you are using another microphone instead of built-in microphone, please try to do the following steps:

Window Vista /XP:

1. Open Live! Cam Center.
2. Click on **Tools**.
3. Go to Audio Source Control.
4. Select microphone under **Audio Source**.
5. Click **OK**.
